Bryant Brock

Native to Alabama, I spent half a decade in north Idaho before moving back to reside in Birmingham. Highly experienced building full-stack web-based applications w/ React, React Native & Node. Avid DIYer, spikeballer, and biography lover.

EXPERIENCE

Anedot, Birmingham AL — *Software Engineer*

APRIL 2022 - FEB 2023

Accomplished the rebuild of a redesigned & improved non-profit campaign management system. Specifically, I was accountable for the donation page builder, much like a website builder. The stack consisted of React 17, Vite, Typescript, react-query & Ruby on Rails with a MySQL db. Hosted on AWS.

Lightcast, Moscow ID — *Software Engineer*

APRIL 2021 - APRIL 2022

Built labor market data charts & tables for reporting purposes, designed and implemented a complex job description parsing input, and converted the legacy PHP-based, server-side rendered application into a REST API that could be consumed by the client-side render React.

ConsignCloud, Moscow ID — *Software Engineer & Customer Service Rep*

SEPT 2019 - OCT 2021

On the consignment store management & POS system, I built much of my foundational skills under the mentorship of Jonathan Staab. The stack consisted of React+Redux, Python Werkzeug API, and PostgreSQL.

Chick-Fil-A, Daphne AL — *Team Member*

OCT 2015 - AUG 2017

Dealt with every aspect of the business: drive-thru, front-of-house, and even worked as line cook in the back during my time there. I love Chickfila.

EDUCATION

New Saint Andrews College, Moscow ID — *B.A.*

AUG 2017 - MAY 2021

Mises University, Auburn AL — *Certificate*

JUL 2020

COMMUNITY WORK

Life Beyond College @ NSA — *Board Member*

Organized speakers for our workshops, worked with other board members to create opportunities for students to think about their future.

TOP SKILLS

Fluent in **Typescript**, **Node**, **Python**, **Git**, **Bash**, **PHP**, **HTML** and **CSS**

Highly experienced using **React, React Native, SQL & NoSQL dbs, Python & Node.js REST APIs.**

Familiar with IaaS platforms (**AWS** and **Google Cloud Platform** primarily)

Collaborating on architecture

Implementing wildly fun projects
